

HD Dash Camera

with 2.4" LCD Screen & Motion Detection

Make sure that you and your family are safe on the road with the Dashmate DSH-410.

Recording 720P HD footage the DSH-410 records the road ahead in High Definition. The wide-angle lens captures 90° of your surroundings ensuring that any action ahead is caught on camera. Built in motion detection detects when there is motion in front of the camera and suspends recording when no movement is detected and resumes recording when motion is detected.

720P RESOLUTION

captures your trip in high definition recording all details on the road.

2.3" SCREEN

allows for easy navigation of menus and playback of recorded footage.

90° FOV

through the wide angle lens brings all details on the road into frame.

MOTION DETECTION

will stop the Dash Camera from recording when no movement is detected.

LOOP RECORDING

records over the oldest video file making sure you don't run out of storage space when you need it.

AUTO POWER ON

each time you start your vehicle the DSH-410 will power up.

AUTO RECORD

recording automatically begins each time your vehicle is started.

PHOTO MODE

gives you the option to take 2MP photos allowing you to document the incident with additional information.
